

ROBERTET  
— GROUPE —

Robertet, the undisputable leader in natural raw materials, deploys its expertise in a cross-functional and synergic approach across three divisions to offer new cosmetic actives & fragrances.

Robertet unveils the renewed concept of ActiScents™, cosmetic fragrances with a natural & active core, and proven physiological properties for the skin and hair.

ActiScents™ result from a remarkable research program screening perfumery aromatic material for their biological properties.

They propose breaking out of the active /sensory experience duality to access a systemic approach to ingredients as well as to their effects on the skin and hair.

Robertet transcends the scents of cosmetics and the notion of actives.

Compositions at the crossroads of olfactory creation and the science of efficient natural ingredients open new areas of innovation in the fields of beauty and well-being.

Welcome to total care.

ActiScent™

Active fragrances for a Naturally Creative Future
